# Renovation of Squash Court Walls

After the squash season is drawing to a close, many facilities are beginning to plan for court renovations. Based on numerous inquiries, the Squash Facilities Network (SFN) has compiled the key points for the maintenance and modernization of squash courts.

## Renovation Guides: Focus on Walls and Floors

Two main aspects are at the center of SFN's recommendations: the renovation of squash court walls and the sanding of squash floors. To provide operators and managers of squash facilities with a solid decision-making foundation, SFN has created comprehensive guides:

### Guide for Painting Squash Court Walls:

- This guide offers detailed information on best practices for painting walls.
- It outlines the key points to consider when choosing paint and preparing the walls.
- The guide includes step-by-step instructions for carrying out the work and provides recommendations for proven products.

### Guide for Sanding Squash Floors:

- The guide for sanding floors contains detailed instructions for preparation and execution.
- It explains which sanding machines and materials are best suited to achieve optimal results.

- Additionally, it offers tips for the care and impregnation of floors after sanding.

## Comprehensive Information and Practical Suggestions

Both files are available for download and offer a wealth of information. They cover not only the technical aspects of the renovation work but also provide concrete instructions and practical tips. Particularly helpful are the product recommendations, which are based on experience and have proven to be especially suitable in practice.

Renovating squash courts is an important measure to keep playing surfaces in optimal condition and to provide players with a top-notch playing environment. With the guides provided by SFN, facility operators are well-equipped to successfully meet this challenge.
